PROFESSIONAL SUMMARY

Product-minded Software Engineer with **3+ years of professional experience** designing and shipping high-performance, responsive web applications using **React**, **TypeScript**, and **Next.js**. Proven track record of developing scalable, reusable component architectures, integrating frontend clients with backend microservices and REST APIs, and implementing robust state management (Redux Toolkit) and API security. Dedicated to clean code, snappy 60fps UI performance across desktop, tablet, and mobile, and cross-functional team delivery.

WORK EXPERIENCE

Frontend Web Developer — Dexi (Smart Dental Assistant) **Jul 2024 – Present**

Cairo, Egypt (Remote) • Part-Time (Current since Jun 2025; Full-Time previously)

- **Automated Clinical Workflows:** Architected and delivered core dental workflow automation features using modular React components and custom hooks—including intelligent task allocation and doctor-staff scheduling—eliminating manual paper logs and cutting administrative overhead.
- **Real-Time Stock & Inventory Management:** Built an end-to-end medical supply tracking interface featuring live stock counts, FEFO batch monitoring, and automated low-stock alerts, preventing procedure delays across clinic operations.
- **State, Security & Error Handling:** Centralized client-side state with Redux Toolkit and implemented frontend token/session management (JWT, RBAC), client-side schema validation (React Hook Form/Zod), and React Error Boundaries, eliminating re-renders and preventing data loss.

Frontend & React Native Developer — PREEZY (GamerG) **Jun 2025 – Jul 2026**

Amman, Jordan (Remote)

- **High-Traffic Web Applications:** Engineered responsive web applications with Next.js and TypeScript, building reusable, maintainable UI components for tournament brackets and live analytics, delivering sub-second load times across desktop, tablet, and mobile.
- **Cross-Platform & Design Systems:** Spearheaded the frontend expansion into React Native (iOS & Android), establishing shared design systems and state patterns that unified user experience across web and mobile ecosystems.
- **Microservices & Real-Time APIs:** Integrated frontend clients with backend microservices via REST APIs and WebSockets, utilizing client-side caching, request interceptors, and secure token handling for smooth 60fps interaction during live events.

Frontend Web Developer — Exabyte LLC **Mar 2024 – Jul 2024**

Cairo, Egypt (On-site)

- **Health Insurance Dashboards:** Developed operational React/TypeScript web portals for health insurance providers, building complex data forms with client-side validation and robust error handling for claims processing and policyholder management.
- **E-Commerce & Sales Analytics:** Built responsive e-commerce storefronts and interactive sales monitoring dashboards with modular React components, giving merchant management real-time visibility into order lifecycles and revenue trends.
- **Agile & Cross-Functional Collaboration:** Partnered closely with UX/UI designers, backend architects, QA, and DevOps teams within an Agile Scrum workflow; containerized frontend environments using Docker, followed clean Git branching standards, and assisted with CI/CD deployment checks.

TECHNICAL SKILLS

Frontend & Architecture:	React.js, TypeScript, JavaScript (ES6+), React Hooks, Component Lifecycle & Architecture, Next.js, React Native
State & Validation:	Redux / Redux Toolkit, Context API, Client-Side Validation (React Hook Form, Zod), React Error Boundaries
APIs, Security & Backend:	REST APIs & Microservices Integration, API Security, Token & Session Management (JWT, OAuth2, RBAC), Node.js, SQL
UI, Tools & DevOps:	Tailwind CSS, Material-UI, Responsive Design (Desktop, Tablet, Mobile), Git, Docker, Kubernetes, Vite, Webpack, Jira, Agile/Scrum

EDUCATION & ACADEMIC PROJECT

Bachelor of Computer Science — Future Academy **Graduated 2023 | GPA: 3.75 / 4.0 (Excellent with Honors)**

Graduation Project — Facetcher: AI deep-learning web platform translating hand-drawn facial sketches into photorealistic human faces. Served as Frontend Lead utilizing **React** to architect the interactive sketch canvas, instant rendering engine, and RESTful API communication with backend machine learning inference servers.

CERTIFICATIONS & LANGUAGES

Certifications:	React - The Complete Guide (incl. React Router & Redux) — Udemy (Dec 2023)
Languages:	English (Professional Working Proficiency) • Arabic (Native)
